Note: Revision of the business forecasts in the third quarter of the fiscal year ending March 31, 2010: None

4. Others

- (1) Changes in Significant Subsidiaries during the Period (Changes in specified subsidiaries associated with changes in the scope of consolidation): None
- (2) Application of Simplified Accounting Methods and/or Accounting Methods Unique to the Preparation of the Quarterly Consolidated Financial Statements: None
- (3) Changes in Accounting Policies, Procedures and Methods of Presentation for the Preparation of Consolidated Financial Statements (Items recorded under changes under Basic Significant Matters Regarding Preparation of Quarterly Consolidated Financial Statements)
 - 1) Changes due to amendment of accounting standards: Yes
 - 2) Changes due to reasons other than 1): None
 - Note: For details, please refer to "(4) Others" of "Qualitative Information and Financial Statements" on page 6.

(4) Number of Issued and Outstanding Shares (Common stock)

1) Number of shares at the end of the period (incl	uding treasury stock)
As of December 31, 2009:	599,921,851 shares
As of March 31, 2009:	599,921,851 shares
2) Number of treasury stock at the end of the peri	od
As of December 31, 2009:	20,808,071 shares
As of March 31, 2009:	20,750,714 shares
3) Average number of shares during the first nine	-month period
Period ended December 31, 2009:	579,144,903 shares
Period ended December 31, 2008:	579,227,399 shares

* Remarks on appropriate use of forecast results of operations and other special matters

(Notes regarding forward-looking statements)

The above business forecasts are based on assumptions in light of the information available as of the date of announcement of this material, and the factors of uncertainty that may possibly impact the future results of operations. The Company's actual results may differ significantly from those presented herein as a consequence of numerous factors such as economic conditions, competitor situations and fluctuations in land prices. Please refer to the section of "3. Qualitative Information Regarding Consolidated Business Forecasts" of "Qualitative Information and Financial Statements" on page 6 for details.

Qualitative Information and Financial Statements

1. Qualitative Information Regarding Consolidated Business Results

During the first nine months (April 1 to December 31) of fiscal 2009, the Japanese economy showed signs of a recovery in exports and industrial production, largely due to improvements in the economic situation in Asian countries, as well as the effects of the government's economic stimulus measures. Despite these positive factors, however, against the backdrop of declining corporate earnings, companies curbed capital investment, and unemployment remained at a high level.

In the housing industry, the Group's principle business field, some positive effects were seen from government measures such as revisions to the taxation system related to home acquisition and renovation, and subsidies for the introduction of photovoltaic power generation systems and ENE-FARM household-use fuel cell co-generation systems. These were exceeded by the negative factors of rising unemployment and deterioration in wage levels, as well as the sluggishness of the real estate market. As a result, the overall number of new housing construction starts was low. In the field of general-purpose construction, too, the entire industry suffered from difficult operating conditions during the reporting period, owing to the continued tendency of companies to scale back capital investment plans amid the economic downturn.

In these circumstances, the Daiwa House Group positioned still greater management efficiency as an urgent task, and worked to improve business performance through a focus on three policies – reorganizing the Group's core business structure, investing management resources in businesses in growing markets, and ensuring financial strength and enhancing profitability.

In particular, in our Residential Business, we took steps to supply the market with the new xevoFU and xevoKU models, environmentally friendly, comfortable homes with improved energy-saving and temperature-control features in our mainstay "xevo" series of single-family houses. We have also commenced sales of xevoEDDI, a "designer's eco-housing model" developed in collaboration with architect Edward Suzuki which integrates elements from traditional Japanese homes into a modern architectural design. We acquired certification for a number of our High Quality, Long-Term Housing Models and environmentally friendly house models which already meet government requirements, thereby contributing to our further market penetration in this field.

In low-rise rental housing models, we introduced the eco-friendly SÉJOUR ECOHA and the SÉJOUR WIT, a model which allows freedom of choice with regard to the floor plan. These are some examples of our efforts to strengthen marketing, to respond with greater flexibility to the requirements of landowners.

In addition, we set up a new department responsible for the environment and energy business, and opened 28 marketing offices throughout Japan. We also launched our newly-developed *reFbo* high-efficiency reflective panels, *reFbo Factory* reflective panels for high ceilings, and LED street lights, along with other products, and undertook aggressive sales promotion.

In the CSR field, Daiwa House employees visited elementary and middle schools as guest lecturers under our "D's School" program. Through such activities, Daiwa House, as a house builder, provides ongoing support for school education regarding housing and environment-related issues.

As a result of the above factors, net sales for the first nine months of fiscal 2009 came to 1,166,473 million yen on a consolidated basis, down 4.7% year-on-year. Ordinary income was 50,121 million yen, down 2.8% year-on-year, and net income amounted to 28,070 million yen, up 10.3% year-on-year.

Results by business segment are as follows.

Residential Business

In the Single-Family Houses Division, we have expanded our product lineup. Our "xevo" series now includes more environmentally friendly homes – the xevoFU, a house with a lightweight steel framework, and xevoKU, with a wooden framework. These models enable substantial reductions in heating and electricity expenses and CO_2 emissions through the inclusion of photovoltaic power generation systems and high-efficiency hot-water boilers as standard features. In addition, we have launched the new "xevoEDDI," a "designer's eco-housing model" which incorporates the "xevo" features into the EDDI's House model, developed with Edward Suzuki and introduced in October 2002. "xevoEDDI," visually unchanged from the original EDDI's House, offers enhanced quality meeting "xevo" standards, increased space-saving urban-style floor plan options, and reduced maintenance costs.

Following the establishment in June 2009 of the government's system for certification of High Quality, Long-Term Housing Models, we strengthened marketing activities, taking advantage of the government's incentive program promoting home acquisitions. For example, we appeal to potential customers with the durability of models in our "xevo" series, which incorporate the government's certification criteria as standard, and the available tax benefits. In addition, we are encouraging the widespread adoption of solar-power generation by taking advantage of government subsidies for photovoltaic power generation systems, and have achieved further reductions in CO_2 emissions.

In the Rental Housing Division, we introduced a new eco-friendly model SÉJOUR ECOHA, which offers a reduction in CO_2 emissions and promotes the popularization of energy-efficient rental housing. At the same time, we launched the SÉJOUR WIT, a model allowing freedom of choice with regard to the floor plan, thus responding to landowners' needs with greater flexibility. This is a part of our measures to reorganize the mainstay products in the rental housing segment. Other measures include improvements in product quality, features and specifications, as well as an increase in the exterior design variations being offered. Daiwa House won the "2009 Global Warming Prevention Activity Award" from Japan's Ministry of the Environment, in recognition of its efforts to reduce CO_2 emissions in rental housing.

In the Condominiums Division, we worked to strengthen development of new condominium projects in response to the specific demand characteristics of each region of Japan, and expanded after-purchase support to maximize safety and address buyers' concerns. We also continued providing services aimed at maintaining the asset value of real estate properties. For example, we have developed an online system that allows members of the public to view information such as housing performance evaluations and condominium management services.

In the Home Renovation Division, we actively marketed energy-saving, environmentally friendly renovation solutions, including through a nationwide marketing campaign. We improved this division's performance by reinforcing our capabilities in marketing, design, and renovation work, and we expanded the coverage of our renovation services to include rental housing units in addition to our traditional target of single-family houses.

However, the division's performance was adversely affected by the deterioration of the market environment. Consequently, sales of the Residential Business were 675,509 million yen, down 3.9% year-on-year, and operating income came to 24,986 million yen, up 2.8% year-on-year.

Commercial Construction Business

In the Commercial Facilities Division, the Group made use of planning and proposal-driven sales centered on road-side store development, leveraging its abundant land-related data and store opening support knowhow for tenant businesses. In November 2009 we opened the new large-scale shopping centers Foleo Sendai Miyanomori (Miyagi) and Foleo Hiroshima-Higashi (Hiroshima), while building a management and support system for the operation of these shopping centers.

In the Distribution, Medical/Nursing Care, and Corporate Facilities Division, we continued to undertake construction of large-scale logistics centers, production plants, and logistics facilities for foodstuff sector enterprises. We also made active use of proposal-based marketing for private housing-type nursing homes and rental houses for the aged, and provided support services for corporate customers for the construction of facilities for their marketing operations.

However, sales of the Commercial Construction Business declined 7.4% year-on-year to 350,073 million yen, due primarily to the general trend among companies to curb capital investment, while operating income decreased by 7.7% year-on-year to 40,395 million yen.

Resort Hotels and Sports Life Business

In the Resort Hotels Division, operations have been affected by the spread of the H1N1 influenza virus and the trend among consumers to cut back on expenditures amid the current economic downturn. Despite these negative factors, we made every effort to raise customer satisfaction levels by offering high-quality services, so as to increase the number of repeat guests. As a result, we registered a large number of guests during long holiday weekends and the summer vacation period.

In the Sports Life Division, we opened new sports facilities NAS Wakabadai (Tokyo) and NAS Fushimi-Momoyama (Kyoto). We also commenced other initiatives including new membership plans meeting diverse customer needs, to attract new members to our fitness clubs.

Despite these efforts, sales declined 8.1% year-on-year in this segment to 43,739 million yen. However, operating income came to 5 million yen, compared with an operating loss of 240 million yen in the same period of the previous year, thanks to aggressive cost-cutting efforts.

Home Center Business

In the Home Center Segment, in April 2009 we opened the Royal Kanamono Kitamoto (Saitama). Then, in October 2009 we opened the ROYMALL online shopping website, to supplement our current retail store sales channel. As part of a new product strategy, we have increased the number of products in our "RoyValue" private brand, meeting requirements for high quality and low prices, and have taken various steps to stimulate sales.

Sales of this segment came to 47,389 million yen, down 4.7% year-on-year, while operating income increased by 19.6% year-on-year to 1,359 million yen, due to a decrease in selling, general and administrative expenses.

Other Businesses

In the Housing Construction Material Manufacturing and Marketing Division, we expanded our lineup of storage units, and aggressively marketed products for housing manufacturers. We also made proposals for interior renovation services, primarily for large-scale multifunctional commercial facilities and hotels. Meanwhile, we strengthened our marketing capabilities through total interior coordination proposals by our own specialist staff, and took steps to cut manufacturing and logistics costs.

In the Logistics Division, we completed construction of the Machida Logistics Center (Tokyo) to attract new customers in May 2009, with the aim of expanding our "Asset-Type Third-Party Logistics" business. We

also established an efficient joint delivery system with construction materials makers in some marketing areas to cut costs. In addition, we started up an eco-friendly logistics business, including a maintenance service involving the re-use of interior fixtures and facilities for multi-store operators, aiming to expand the total scale of these operations.

In the City Hotels Division, we opened the Daiwa Roynet Hotel Hachinohe (Aomori), the Daiwa Roynet Hotel Hakata-Gion (Fukuoka), the Daiwa Roynet Hotel Tsukuba (Ibaraki), the Daiwa Roynet Hotel Morioka (Iwate), the Daiwa Roynet Hotel Hiroshima (Hiroshima), and the Daiwa Roynet Hotel Yokohama-Koen (Kanagawa), bringing the total number of our city hotels to 22. Further measures include the acceleration of new hotel openings for the next fiscal year, and the expansion of our menu of special services for individual guest-club members in order to attract new customers.

As a result, sales recorded for this segment came to 98,811 million yen, down 7.8% year-on-year. Operating losses totaled 247 million yen, compared with operating income of 1,747 million yen in the same period of the previous term, due to the impact of expansion into new businesses.

2. Qualitative Information Regarding Consolidated Financial Position

Total assets at the end of the nine-month reporting period stood at 1,842,022 million yen, representing an increase of 31,449 million yen, compared with the 1,810,573 million yen at the end of the previous fiscal year. The main contributing factors were an increase in noncurrent assets due to the acquisition of property, plant and equipment such as high-rise rental housing and large-scale multifunctional commercial facilities, and the inclusion of Cosmos Life Co., Ltd. within the scope of consolidation, which more than offset a decrease in current assets due to the disposal of real estate for sale and a decline in costs on uncompleted construction contracts.

Total liabilities at the end of the nine-month reporting period came to 1,216,786 million yen, representing an increase of 13,640 million yen, compared with the 1,203,145 million yen at the end of the previous fiscal year. This is primarily attributable to increases in noncurrent liabilities from the issuance of bonds by a special-purpose company that is a consolidated subsidiary of Daiwa House Industry, and fund procurement through long-term loans payable and the issuance of commercial paper, which exceeded declines in notes and accounts payable-trade, including accounts payable for completed construction contracts and advances received on uncompleted construction contacts.

Net assets at the end of the nine-month reporting period stood at 625,236 million yen, for an increase of 17,808 million yen, compared with 607,427 million yen at the end of the previous fiscal year. This is attributable to the posting of net income in the amount of 28,070 million yen as well as an increase in net valuation difference on available-for-sale securities due to a rise in the market prices of the securities in question as of the end of the reporting nine-month period compared with the previous fiscal year-end, which exceeded cash outflows for the payment of term-end dividends for the previous fiscal year.

3. Qualitative Information Regarding Consolidated Business Forecasts

Full-year consolidated business results forecasts for the year ending March 31, 2010 remain unchanged from the revised forecasts appearing in the "Summary of Financial Results for the Second Quarter of the Fiscal Year ending March 31, 2010," released on November 10, 2009.

4. Others

(1) Changes in Significant Subsidiaries during the Reporting Period (changes in specified subsidiaries resulting in changes in the scope of consolidation): No items to report.

- (2) Application of Simplified Accounting Methods and/or Accounting Methods Unique to the Preparation of Quarterly Consolidated Financial Statements: No items to report.
- (3) Changes in Accounting Policies, Procedures and Methods of Presentation for the Preparation of Quarterly Consolidated Financial Statements
 - Changes in accounting standards

Changes in accounting standards for recognition of construction revenues and cost of completed work

With regard to accounting standards employed for the recognition of revenues resulting from construction work undertaken for customers, we previously recognized the total lump-sum amount of the completed contract values at completion, using the completed-contract method. However, with effect from the first quarter of the fiscal year ending March 31, 2010, the Accounting Standards for Construction Contracts (ASBJ Statement No. 15, issued on December 27, 2007) and the Guidance on Application of Accounting Standards for Construction Contracts (ASBJ Guidance No. 18, issued on December 27, 2007) have been applied to construction contracts. The percentage-of-completion method is applied to construction contracts meeting the following criteria: construction had started within the reporting nine-month period (except for short-period work); and the percentage of construction already completed by the end of the reporting period can be estimated fairly reliably. (The estimation is based on the proportion of direct costs incurred for each work phase as compared with the estimated total cost for the entire contract.) Other than the above-mentioned construction contracts, the completed-contract method has been applied.

As a result of this change, net sales for the reporting first nine months increased by 46,242 million yen, while operating income, ordinary income, and income before income taxes and minority interests all increased by 9,468 million yen, compared with the application of the previous accounting standards.

The effects of this change on each business segment are indicated in the relevant sections.

Notes: 1. Method of industry segmentation

The Company has defined industry segments based on the currently adopted sales classifications: Residential Business, Commercial Construction Business, Resort Hotels and Sports Life Business, Home Center Business and Other Businesses.

- 2. Major business components of each industry segment
 - [1] Residential Business

Construction, subdivision and rental of single-family houses, residential complexes (including dormitories, corporate housing and apartments) and condominiums; Subdivision of real estate for residential use;

Real estate agency services;

Rental and management of residential complexes;

- Management of condominiums
- [2] Commercial Construction Business
 Construction, rental and management of commercial buildings such as distribution facilities, shops, offices and factories;
 Sales and rental of real estate for commercial use
- [3] Resort Hotels and Sports Life Business

Operation of resort hotels, golf courses and sports facilities

- [4] Home Center Business Operation of home center business
- [5] Other Businesses

Manufacture and sale of construction materials; logistics business; operation of city-type hotels; other

3. Change in accounting policies

Current consolidated performance for the first nine-month period (From April 1, 2009 to December 31, 2009)

As described in the "Changes in Accounting Policies, Procedures and Methods of Presentation for Preparation of Quarterly Consolidated Financial Statements," beginning the first quarter of the fiscal year ending March 31, 2010, the "Accounting Standard for Construction Contracts" (ASBJ Statement No. 15, issued on December 27, 2007), and the "Guidance on Application of Accounting Standards for Construction Contracts (ASBJ Guidance No. 18, issued on December 27, 2007) have been applied for construction contracts.

As a result of this change, net sales for the reporting first nine months increased by 24,383 million yen for the Residential Business, by 21,825 million yen for the Commercial Construction Business, and by 33 million yen for the Other Businesses, and operating income increased by 5,702 million yen for the Residential Business, by 3,761 million yen for the Commercial Construction Business, and by 4 million yen for the Other Businesses, compared with the application of the previous accounting standards.

[Segment information by geographic region]

Consolidated performance for the previous first nine-month period (From April 1, 2008 to December 31, 2008) Description has been omitted as the ratio of Japan to the total segment sales exceeded 90%.

Consolidated performance for the current first nine-month period (From April 1, 2009 to December 31, 2009) Description has been omitted as the ratio of Japan to the total segment sales exceeded 90%.

[Overseas sales]

Consolidated performance for the previous first nine-month period (From April 1, 2008 to December 31, 2008) Description has been omitted as the ratio of overseas sales to the consolidated net sales was below 10%.

Consolidated performance for the current first nine-month period (From April 1, 2009 to December 31, 2009) Description has been omitted as the ratio of overseas sales to the consolidated net sales was below 10%.

(6) Notes on Significant Changes in the Amount of Shareholders' Equity
